

TECTERRA

investing in innovation

What We Do

Stimulate the economy. Through a full range of support programs, TECTERRA enables Canadian companies to bring innovative geomatics solutions to market. We support technologies developed for integrated resource management and other geospatial applications. Our uncomplicated investment and grant programs are building blocks designed to reduce your risk and support you through each phase of product development and commercialization.

TECTERRA also provides meaningful networking opportunities and targeted professional development services to maximize your business potential and commercial success. With a proven track record serving companies across Canada, TECTERRA is a catalyst for the successful commercialization of geomatics technology solutions.

Impact

Since June 2010 TECTERRA has enabled commercial success through funding commitments of **more than \$12M** toward geomatics companies and applied research projects for technology commercialization, training, and new job creation.

- **\$282M** (projected*) **in resulting commercial activity over the next three years**
- 181 people trained on geomatics equipment and applications
- 111 jobs created/supported with a resulting value of \$57.3M
- 47 companies supported, including 13 start-ups
- 17 Alberta applied research commercialization projects funded
- 11 breakthrough technologies supported
- 6 industry patents filed with another 22 patents in progress

Range of Services

TECTERRA provides a full range of commercialization support services for pre-during-post product development activities.

- Pre: GECKO, \$25K for business plan development
- Pre & During: Geomatics Lab equipment access and training
- During: Up to \$500K investment per commercialization project
- Pre-During-Post: Networking program to enable commercial interaction
